

WITH LOVE FOR UKRAINE!
WITH RESPECT FOR THE WORLD!

An aerial photograph of a vast highberry plantation in Ukraine. The rows of plants stretch across the landscape, illuminated by the warm, golden light of a low sun. In the background, a line of trees and a small white structure are visible against a clear blue sky.

HIGHBERRY
GROWN
AND FROZEN
IN UKRAINE

ABOUT HIGHBERRY

The agricultural production complex "HIGHBERRY" was founded in 2011
in the northwestern region of Ukraine.

We are located in an ecologically clean part of the Volyn region,
in the area of the Cheremsky Botanical Park.

2011

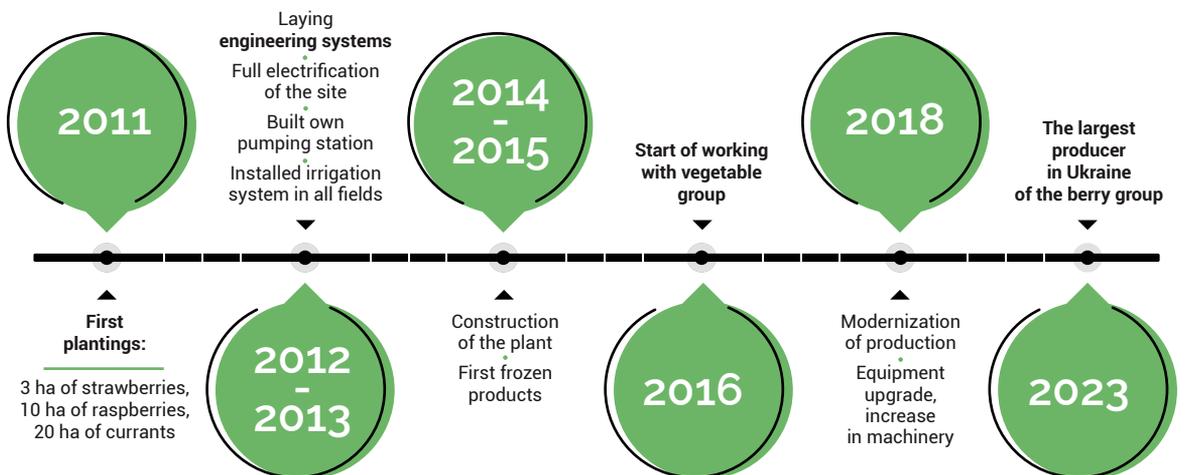

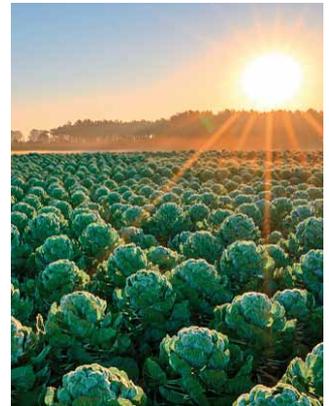

ON THE MARKET
SINCE **2011**

2200 m²
OF FREEZING AND
PROCESSING PLANT

417+ hectares
OF AGRICULTURAL LAND

WE ARE NEARBY

The agricultural production complex «HIGHBERRY» meets the demand of Ukrainian and European consumers for fresh and frozen products of absolute quality through our own cultivation and production.

Our advantageous geographical location and proximity to the European border allow us to reduce costs and time when delivering products to our clients in Ukraine and for export to European countries.

CULTIVATION AND PRODUCTION

The agricultural production complex "HIGHBERRY" constantly improves the technology of crop cultivation, achieving maximum yield per hectare.

A unified agrochemical analysis in each kilogram of the entire batch guarantees the quality of the products harvested from our fields.

"HIGHBERRY" is one of the largest strawberry producers in Ukraine and a member of the "Berry Growing Association of Ukraine".

By carefully inspecting the products grown in our fields, we guarantee their quality and safety, confirmed by the appropriate certificates.

The "HIGHBERRY" agricultural production complex has a fruit and vegetable processing plant that meets quality standards confirmed by the "HACCP" certificate. The plant processes and freezes our own berries, fruits, vegetables, and various fruit and vegetable mixtures on an industrial scale.

RASPBERRIES
25,3 ha

RELIABLE PARTNER

The "HIGHBERRY" complex is one of the largest strawberry producers in Ukraine and is a member of the "Berry Growing Association of Ukraine"

417 hectares of own agricultural land provide high yields on an industrial scale

Five European countries receive "HIGHBERRY" products for export

The plant is equipped with modern equipment for processing and freezing products

Guarantee of freshness and minimal damage to agricultural products due to the close proximity of the plant to the fields

Product quality and safety are confirmed by the HACCP certificate

Expected yield of 2000 tons of berries and fruits. Approximately 5000 tons of vegetables

All plants undergo a full cycle under the careful supervision of the "HIGHBERRY" team of agronomists, from seeds and seedlings to mature plants

Convenient delivery of products to our clients in Ukraine and export of products to European countries thanks to advantageous geographical location and close proximity to the European border
